Dear Hiring Manager:

I am pleased to have the opportunity as QA Tester, posted on company website 09/14/2023, given the requirements business practices, make me an excellent fit for this position. Currently I joined internship program as Manual QA Engineer, I successfully worked as software tester/QA/Data analyst in Ethiopian Transport Authority for over 7 years where reviewing software requirements and preparing test scenarios, analyzed test results on database impacts, errors or bugs, and usability, run manual and automated tests by using JIRA, work on multiple projects at one time, created use cases, user stories, RTM, test plans and test scripts for functional requirements. I 'am looking for a bigger challenge to grow my career.

I currently working remote as software tester and Software Engineer, as freelancer. I am fully prepared and excited about the next step in my career. I look forward to hearing from you to discuss this position further. Thank you in advance for your time and consideration.

Respectfully,
Bezualet Tekaligne
